Allowable Subject Matter

Claims 1-3, 5-8, 13, 16-17, 24-26 are allowable. The following is an examiner's statement of reasons for allowance:

The independent claims 1, 13, 24 recite the limitations "a code/instruction is written/stored at the end of a first page and the subsequent/following page is uninitialized, such that hardware/processor will disable instruction caching for the second page that is un-initialized" along with other limitations, which prior art did not disclose.

Art Unit: 2116

The independent claims 25 and 26 recite the limitations "instruction to enable instruction caching is stored at the end of a first page in the non-volatile memory" and "the storage location of the first instruction provides that instruction caching be software enabled from the non-volatile memory but be hardware inhibited until execution passes from the non-volatile memory to the cache memory" along with other limitations, which were not disclosed by prior art.

The other claims are dependent claims, which further narrow the respective independent claims. Therefore, they are allowable too.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
